Passionate Full Stack Developer with a love for coding and data analysis skills in SQL technologies and proficient in creating scalable web applications with expertise in front end and back-end technologies optimization DNS performance improvement. I have a love for crafting SQL queries and organizing intricate data sets to enhance data operations effectively. I am eager to contribute my problem-solving abilities, technical knowledge, and dedication to ongoing enhancement in any software development position.

Experience

Full Stack Developer (Project Work)
Developed a Full-Stack Web Application: Utilized the MEAN (MongoDB, Express.js, Angular, Node.js) stack to create a single-page application (SPA) with dynamic components and RESTful API integration, optimizing performance and ensuring scalable data management.

Front-End Optimization and Performance: Created reusable Angular components and optimized front-end performance by minimizing redundant code and applying best practices for responsiveness and load efficiency.

Developed a Python-Based CRUD Module: Created a CRUD module to manage data between front-end widgets and a MongoDB backend, ensuring efficient and adaptable data handling within a dashboard application.

Professional Experience

ITV Technician III
Laredo Independent School District | January 2018 – August 2023
- Led technical operations for video production, ensuring high-quality content for district-wide communication.
- Managed complex audio and video systems, troubleshooting and maintaining state-of-the-art equipment.
- Collaborated with internal teams to deliver consistent, reliable broadcast outputs.

Chief Photographer
KGNS-TV | March 2015 – January 2018
- Directed news gathering and video production, delivering compelling visual content for broadcast.
- Mentored a team of photographers, ensuring adherence to quality standards in video production.

Education

Bachelor of Science in Computer Science
Southern New Hampshire University (Online) | Expected Graduation: October 2024

Associate of Science in Computer Science
Southern New Hampshire University (Online) | 2023 – 2024
